

**Best Practices**

6.1.1 Mention two practices of decentralization and participative management during the last year (maximum 500 words)

Our two main practices which we consider as main decentralization and very participative management during last year are NSS and YOGA through which we have received very good effects on students and society even. We receive specific results in the attitudes of students regarding manners and the sense of social services. Through NSS we organise 07 day camp at nearby village to provide the awareness of Cleanliness, Tree plantation, Medical camps by inviting Doctors ,Girls' education, competitions in primary schools ,encouraging them by prizes, with the help of village people we interact with locality to improve their living standards. Our students do participate in special programmes on Save Girl Child, Girls' Education and Women Empowerment to encourage the society on these specific requirements. Through we arrange special sessions on The awareness on Voting and interact with Voters on the great value on Nation's growth and Democracy .Adding more to this we organise two One Day camps in a year.

As our college is in rustic area we organise Yoga Shibirs every year as it is needed in the society. We receive best results when maximum numbers of students and people do participate in yoga Shibirs. We invite Yogiji who remains expert in yoga and he interacts with required patients on their deceases. We get very good response from our local area people as it remains best practice from our institute. We run regularly 365 days ' Samarpan Dhyan Kendra' and 'Vipasyana Kendra' at our college campus and number of locality people do get great benefits out of these . They get mental and physical improvements through these two practices. We have permanently specific two halls for such Shibirs.
